It's simple, nicely laid out, and easy to navigate. The bezel is thin enough that it "disappears" during use. Color is a major concern and Sony seems to be ever so slightly ahead in that department at this price point. Including standard dynamic range material, the MU9000's picture is definitely a cut above anything we've seen in the last few years, barring quantum dot and OLED models, and the motion handling is outstanding. But as we said, it's a cool temperature image. Color on the other hand, is strictly run of the mill. And you simply can't beat the interface and remote, although those are minor concerns when it comes to buying a TV. Let's take a look at what the model does include. Out of the box the SSTV comes packaged in a slim, colorful box (around 38 pounds) that looks like it was designed to slide easily off a shelf and onto a cart at a big box store. The Premium UHD series features a scaled-down version of the One Connect breakout box found on Samsung's SUHD and QLED TVs. If you're not familiar, a breakout box is a separate box that's connected by a single cable to the TV and "breaks out" the inputs and/or outputs. Total set-up time to get the SSTV operational and running its first templates takes about half a day, depending on the user's abilities. The television hardware itself features a professional-grade LED-lit LCD display (60 Hz Slim Direct-Lit Panel) and has about 16 hours of battery life to align with most business hours. So far, it appears to be a solid television - now let's take a look at the signage solution. TODAY'S BEST DEALS Samsung At a Glance Smooth motion Best-in-class user interface and remote control. Lacks the accuracy and vibrancy of the company's SUHD and QLED TVs. One Connect breakout box doesn't offload the ethernet port. While lacking the rich, highly accurate color of Samsung's QLED TVs, the MU9000 series holds its own with anything not using quantum dots or OLED. HDR-10 content (Dolby Vision isn't supported) was handled well for a 515-nit (our measurement) TV, with modestly brighter highlights and some improvement in detail in both darker and lighter areas. Conclusion The MU9000 looks good, and presents a very smooth, even image with nice detail. These are excellent TVs for the price. The playback apps on the MU9000 work well, understanding all the common photo, video, and music formats. We didn't manage to do anything but screw it up. The SSTV, however, is aimed at single location storefronts and service providers - not corporate businesses. The mid-range, however, where Samsung's MU9000 series Premium UHD TV resides, is rife with competent sets. The UN55MU9000 reviewed here (\$2,000 MSRP available for \$1,497.99 at Amazon) raises its head above the crowd by virtue of its super-smooth motion, excellent user interface, and stylish remote. There are plenty of picture and color tweaks for those who like to tweak, but Samsung has things set pretty well to begin with. Performance If you've seen Samsung's QLED or older SUHD TVs with quantum dots, you'll probably be a bit disappointed in the MU9000 series' color. That's a rarity, and it surprised us coming from Samsung. Samsung The MU9000 series is thin and handsome. I took a close look at the new Samsung Smart Signage TV to tell you what you can expect. Overview Smart TV systems are nothing new. In fact, the product is being rolled out at club retailers as well as major electronics stores. That includes the Samsung Smart Signage Platform (SSP), which comes with a lot more bells and whistles than the SSTV. As usual with LED, reds slide slightly to the magenta, greens to lime, and the entire spectrum skews slightly cool. You can present smooth video at 60 cycles per second, it just doesn't happen often. Avoid using near bright fluorescent lights or neon signs. The color and shape of the remote may vary depending on the model. Intermittent Wi-Fi Make sure the TV has a network connection (> Settings > General > Network > Network Status). Make sure the Wi-Fi password is entered correctly. Check the distance between the TV and the Modem/Router. Interface and remote We can't say enough good things about the latest Samsung user interface, which is featured on their better TVs and disc players. Onscreen content displays crisp and clear. The One Remote remote control is also excellent, with just the right amount of buttons for control and skipping to functions on screen. The distance should not exceed 50 ft (15.2 m). Reduce interference by not using or turning off wireless devices. IDG The MU9000's remote is a study in effective minimalism. Samsung Smooth motion with only the tiniest of artifacts is one of the MU9000's series' many strengths. We should also mention that unlike many TVs, you can adjust the settings while HDR material is playing. The built-in speakers are both 10W. Design The 55-inch class UN55MU9000 follows the modern thin-screen design: narrow at the top and thicker at the bottom (depth-wise), where the electronics are stored. (The Wi-Fi strength can be decreased by appliances, cordless phones, stone walls/fireplaces, etc.) Mounting the TV on a wall Samsung Electronics is not responsible for any damage to the product or injury to yourself or others if you choose to install the wall mount on your own. To order the wall mount kit, contact Samsung Customer Care at 1-800-SAMSUNG (1-800-726-7864). You can install your wall mount on a solid wall perpendicular to the wall. Newest Added: UN55NU6900FXZC SM-G986UZKACCT SRP680CDLS HT-J7750W MS40J5133B Series: 6 SERIES Tags: Samsung TV Manual Series 6, Samsung TV 6500 Series, Samsung Srs673dmb, Samsung 6500 Curved, Samsung Ww90r554dax, SAMSUNG RS64R5315B4/SA, Samsung 35" 6 Series Page 2 Download more: There are 2 documents for Samsung UN40MU6300FXZC. Click on the links below to download. User Manual Samsung UN40MU6300FXZC 40" UHD 4K Flat Smart TV viewing... E - Manual (English) Samsung's Smart Signage TV (SSTV) is billed as an all-in-one digital signage solution for small business owners. If you haven't, forget we mentioned it, because nothing else with an LED backlight compares either. Screen uniformity was top notch, though there was noticeable leakage around the edges of the TV when a dark background was used. That includes APE, FLAC, and Apple lossless audio, as well as nearly every flavor of h.264/265 video. Known as MagicInfo Express, the interface lets each business owner showcase daily specials, promote new products, play videos, and broadcast live TV - or any combination of these in a split screen display. Unlike costlier digital signage solutions aimed at the B-to-B market, Samsung is betting this nimble model, with its lower price point, out of the box set-up, and availability at big box stores, will be a hit with small business owners. Documents: Go to download! User Manual Owner's manual - (English, French) Other Documents User manual Television for Samsung UN58MU6070FXZC Table of contents Package Content TV Installation Mounting the TV on a wall Providing proper ventilation for your TV Safety Precaution: Securing the TV to the wall to prevent falling The Remote Control Installing batteries into the remote control Initial Setup Using the TV Controller Troubleshooting and Maintenance Troubleshooting What is Remote Support? Eco Sensor and screen brightness Still image warning Caring for the TV Specifications and Other Information Specifications Environmental Considerations Decreasing power consumption Dimensions Licenses FCC and Warranty Information Federal Communication Commission Interference Statement This Class B digital apparatus complies with Canadian ICES-003. IMPORTANT WARRANTY INFORMATION REGARDING TELEVISION FORMAT VIEWING Installing batteries into the remote control Match the polarity of the batteries to the symbols in the battery compartment. Use the remote control within 23 feet of the TV. Bright light may affect the performance of the remote control. It's not as nice as the remote found on the Samsung Q9F we reviewed, with its multiple modes, but it's darn close. Samsung UN40MU6300FXZC 40" UHD 4K Flat Smart TV - Use Manual - Use Guide PDF. Again, that's an issue common to nearly all LCD TVs. The MU9000 aces nearly all our color, motion, bleed, and pattern tests with the exception of fine vertical lines where it misplaced any number of them in a floating jumble. It might be even better with couple of additional dedicated transport controls to make controlling video and audio media easier. Available in 40 and 48-inch models, priced at \$749 and \$999, respectively, (about E450, AU\$790 or E610, AU\$1,065) these screens come loaded with content management software. Between that and the stylish stand, the TV looks quite nice sitting on a table (or mounted on the wall). We noticed little to no judder, and there was hardly any shimmer on detailed panning shots at the default settings. Our only wish is that there was a way to quickly skip to the beginning or end of the row of apps, as this often involves an annoying amount of scrolling. Oddly, though this version of the One Connect contains only HDMI, USB, and audio ports: leaving the ethernet connection on the TV, along with a single USB port. Samsung The smaller version of the One Connect breakout box that ships with the MU9000 has no ethernet port - that's on the TV. There's not a lot of bass, but you probably won't feel the need to immediately run back to the store for a soundbar. LG's Smart TV with WebOS has a comparably-sized 42-inch model going for \$849 (about E520, AU\$905), while Panasonic just announced its new smart 4K TV line - including the new flagship AX902. But overall, you'll never mistake this TV for a QLED or OLED playing HDR-10, or to be honest, Sony's 700-nit X930E. Not Available Note: When you purchase something after clicking links in our articles, we may earn a small commission. The TV sounds pretty good on its own. Samsung labels the MU9000 as having Motion Rate 240, which means the hardware refresh rate is 120Hz, and it does make a difference. But while these televisions are aimed at a more general consumer and allow users to do everything from browse the web to use apps, SSTV is more of a niche product designed to do one thing well - display signage. In fact, the SSTV could be considered a pared-down version of some of Samsung's existing digital signage solutions for enterprise use. Read our affiliate link policy for more details. Also, verify that there are no obstacles between the TV and the Modem/Router. On the other hand, the MU9000 handles motion superbly. Inside is everything required to get the TV up and running. The box includes the SSTV and TV stand, the MagicInfo Express content management software (preloaded on the TV), components for a wall mount, a quick setup guide, power cord, warranty card, remote control with batteries and a USB stick for transferring content to the TV. The default overall palette was tolerably light, not darkened to the point of distraction (as it is with some TVs in an attempt to make light sabers pop). At the high end of the TV market, you have Samsung's QLED, OLEDs from LG and Sony - and not a lot else to choose from. The display on both models features a resolution of 1,920 x 1,080 and a brightness of 350nit. On the bright side, we were unable to find any non-artificial material where the problem reared its head. HDTVs TV and Video Consumer Electronics Movies You might compare the Vizio P-series as well, but the UN55MU9000 will win some fans. Samsung itself states that to make HDR really pop, you need 1,000 nits. We understand the USB port, but running an ethernet cable to the TV somewhat defeats the purpose of a breakout box, though with 802.11ac Wi-Fi onboard, most users will connect to the network wirelessly. The purpose is to replace a bunch of cable connections with just one, making the whole deal easier to use and hide.
